### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Fred Grasso on 04/03/06.

The application has been amended as follows:

Claims 4,6-7,11,13,15,17-19,22,25,26-27 have been canceled since it is drawn to non-elected embodiments.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, 20 and its dependent claims the prior art of record fails to teach or render obvious a system or method having two balloons each having a separate inflation lumen and located at the distal end of the catheter wherein one balloon is within the other and the outer balloon has a greater elasticity than the inner balloon and in combination with all the elements or method steps and further comprising a therapeutic coating on the exterior of the outer balloon when in the unexpanded and expanded state.

With respect to claim 12 and its dependent claim, the prior art of record fails to teach or render obvious a system having two balloons each having a separate inflation

lumen and located at the distal end of the catheter wherein one balloon is within the other and in combination with all the elements and further comprising a therapeutic coating on the exterior of the outer balloon and the outer balloon is impervious to the therapeutic agent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

The following changes to the drawings have not been approved by the examiner. New proposed figure 2 is not approved. Applicant needs to resubmit a clean copy of this figure since it appears that artifacts may have been included in the fax transmission at lead line 18. Further, if the intent of applicant were draw a "black box" figure of the notch and rib, then this would be approved. With respect to proposed figure 5, this figure is still not approved since a declaration is not persuasive. The notches or ribs would not be gleamed from the specification as drawn in figure 5. This would not have been obvious to one of ordinary skill in the art since notches and ribs can be drawn in many ways. The notch and rib language is not new matter in the specification , however the drawing being introduced is considered to be new matter and thus not approved for entry. New figure 16 proposed 02/24/05 is also not approved. In order to avoid

abandonment of the application, applicant must make these above agreed upon drawing changes.
